

Overview of

HOSPIMATE
DIGITAL HEALTHCARE REDEFINED

Hospital Management System (HMIS) / Clinical ERP

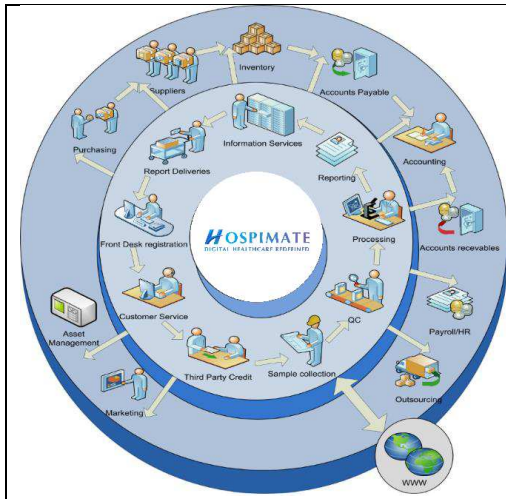

Overview

A. Application:

HOSPIMATE can be implemented in all type of Hospitals and medical diagnostic laboratories namely:

- ✓ General/Specialized Hospital
- ✓ Clinic
- ✓ Healthcare Center
- ✓ Reference Laboratory
- ✓ Private Laboratory
- ✓ Clinical Research Laboratory
- ✓ Clinician laboratories
- ✓ Pharmacy

B. Modules (28):

Patient EMR	Blood Bank
Staff, Corporate and B2B	Inventory & Fixed Assets
Billing / Patient Financials	Pharmacy
Pathology / Laboratory	Cafeteria
Radiology / Imaging	Accounts
Emergency / Daycare	Human Resources / HRM
Out Patient / OPD	Administration and Security
In Patient / IPD	Eye / Optics
Operation Theatre / OT	MIS
Dialysis	Information Desk
Physiotherapy	Academic Management System
Gastroenterology	Library Management System
Vaccination	Marketing
Doctor's Module	SMS

C. Special Features:

<ul style="list-style-type: none"> • Barcode and QR Code enabled. Barcode reading in all functional points • SMS Integrated for 50+ events • Extra-ordinary Queue Management module with callout in Bengali and many other features • Integrated Inventory and Accounts • Wide range of LIS Integration (20+ Brands and 150+ Models) • Integrated Reagent Management • PACS Connectivity, Server and Viewer • Online Patient Portal • Mobile Application • Wide range of in-built reports with Direct Print, save as Excel / PDF / RTF / E-Mail facility • Dynamic Printer selection for different types of report • Patient EMR with ID card and document storage • Less than 10 seconds to make a bill ! • Accurate, precise, smooth and fast • Generic Look and Feel with keyboard shortcuts • Comprehensive searching and sorting facility • Strong Security mechanism with Audit Trail • Very less customization required. Therefore, Quick installation and go live • Automatic and simultaneous data backup in several media locations and types • Continuous R&D with new thoughts and technologies

D. Benefits:

Patient Service
<ul style="list-style-type: none"> ❖ Barcode enabled in all functional points makes patient service process very fast and accurate ❖ Patient's photograph can be taken and printed in registration form instantly within a blink of eye; no-need of hardcopy scan, browse and tagging. ❖ Patient's reference documents (such as prescription, old reports, digital files, etc.) can be captured and stored in patient's file very easily. ❖ High-quality Patient's Registration Card can be printed instantly on PVC media ❖ Mobile apps for searching & booking doctor, drugs, tests, etc. available in a center
User Experience (UX)
<ul style="list-style-type: none"> ❖ Automatic alerts sent on critical issues to all or specific users based on user's role/activities. Alert program is interactive. ❖ Very smooth operations with almost no delay in running the forms and reports; And therefore a high-level of user experience. ❖ Generic look and feel across all the forms and reports which in turn ensures user comfort at highest level ❖ Font and Color (Graphics) of the forms and reports are very soothing for users specially in cases of long working hours ❖ Keyboard shortcuts for common functions such as Add, Remove, Undo, Redo, Save, Print, Exit, etc. ❖ Easy to use Calendar built-in next to all date fields for faster user-input ❖ Reports run in full-screen mode, no need to resize ❖ All reports are with drill-down facility which enables quick in-depth analysis. No need to run separately with putting the parameters. ❖ All necessary reports are bundled. Yet, new reports are developed or old reports are customized per requirement. ❖ Reports can be viewed, directly printed, saved to MS Excel, PDF, MS Word or sent via e-mail ❖ Full-screen list of values (LOV) ❖ Faster Search, Filter and Sorting options in all forms ❖ Automatic printing enabled in all billing modules, sample collection, etc. ❖ Printer is automatically chosen during different reports printing. For example, 1. you print barcode sticker of pharmacy items in thermal sticker printer, 2. print sales receipt in POS printer and 3. print revenue reports in laser printer . You need not choose the required printer each time you for different printing purposes. It works even if you share printers among workstations!!
Patient's Experience
<ul style="list-style-type: none"> ❖ On Registration, automatic SMS sent to patient's mobile containing the registration ID ❖ Automatic SMS sent to patient's guardian/attendant on IP Admission, Deposit, Bed Transfer and Discharge ❖ Automatic SMS sent each time to patient's guardian/attendant on Deposit ❖ Mobile Apps to search for available tests/services, doctor's list, appointment, diagnosis result, etc. ❖ Web module to search for available tests/services, doctor's list, appointment, diagnosis result, etc.
Top Management
<ul style="list-style-type: none"> ❖ Automatic SMS and/or E-mail on daily Revenue ❖ Reports are designed based on real-life business perspectives and analytical thoughts ❖ All necessary MIS reports are bundled. Yet, new reports are developed or old reports are customized per requirement. ❖ MIS reports run in full-screen mode, no need to resize ❖ All MIS reports are with drill-down facility which enables quick in-depth analysis. No need to run each report separately with putting the parameters, again and again ❖ Reports can be viewed, directly printed, saved to MS Excel, PDF, MS Word or sent via e-mail ❖ Best designed report module ❖ Mobile App to view MIS reports

IT Management
<ul style="list-style-type: none"> ❖ Multi-branch Distributed OLTP and Cloud-based OLAP system ❖ OLTP (Local) Database can be configured as local or cloud ❖ Daily automated Data Backup & Quick Restore ❖ Self-Service automated Database tuning ❖ System health monitoring capacity ❖ All errors are logged for easier debugging ❖ All activities are logged for accountability ❖ Very strong software security & privilege mechanism ❖ Force Logout specific or all connected users on suspicious activities or maintenance purpose ❖ Full features of world's no. 1 ORACLE® database 11g with RAC and Oracle Forms ❖ Easy to deploy and maintain
Support Service
<ul style="list-style-type: none"> ❖ All reports are customized per customer's requirements. ❖ Any issues resolved within 2 hours (of addressing) by our expert service team ❖ Developed and supported by Oracle certified and industry's top-notch professionals with years of intensive domain experience ❖ Continuous R&D on quality improvement and feature enhancement to enrich with latest technologies and international standards

E. Risk Management (Backup / Recovery):

1. Daily, automated and Full Database Backup in several media locations (backup server, shared folder location in LAN, removable HDD, google drive, etc.)
2. In case of database failure, data will be restored within 30 minutes from backup files.

F. Support Service:

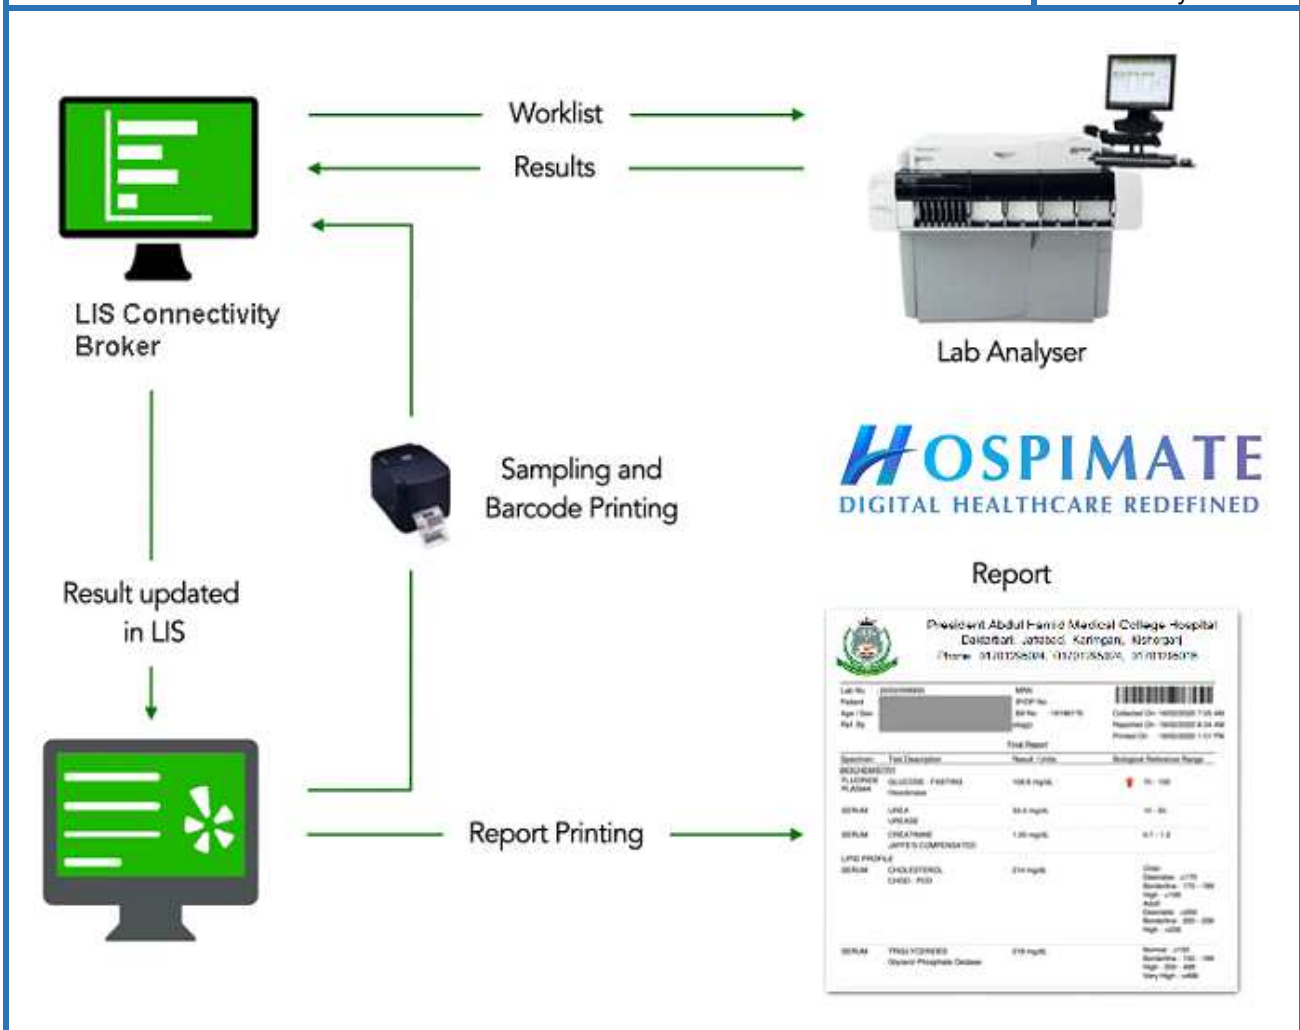

1. At the time of Implementation, training will be provided to all specially to IT personnel's and after live any further training session costing will be set upon mutual agreement.
2. Client must provide online access to system to have instant support. In serious disaster of system physical presence of Excellence ICT's Professional will take less than 2 hours.
3. Client will not get any access in database for security. If client forcefully want to have database access, then Excellence ICT will not be responsible for data and database.
4. Client must ensure physical security of database, application, host connection, SMS servers & smooth network.
5. Yearly Downtime of System **24 Hours** for any database or system maintenance which will take or place by approval of respective client.

Modules & Functions

Patient EMR (Electronic Medical Record)	
<ul style="list-style-type: none"> ❖ Very fast registration ❖ Separate forms for Quick & Detail registration ❖ One-time registration, all clinical and billing history preserved in EMR against the registration number ❖ Standard Registration No. format (example: 11711000024) includes Branch ID, Year, Month and Sequence ❖ Printed registration card with barcode ❖ Documents (Photograph, Prescription, Reports, etc.) scan & attachment 	<p>Actions: Patient Registration Patient Medical Records Patient Registration Card Print</p> <p>Reports: Date-wise Patient Registration Blank Registration Form Patient Sticker</p>
Billing / Patient Financials	
<ul style="list-style-type: none"> ❖ Very fast, accurate and simple billing with quick Item searching capacity ❖ Top quality report formats ❖ Standard Bill/Invoice No. format (example: 11711000024) includes Branch ID, Year, Month and Sequence ❖ Documents (Patients Photograph, Prescription, Reports, Images, Discount authorization/request reference, etc.) scan and attachment ❖ Billing of several patients simultaneously to serve the queue properly ❖ Easily manage IPD patient's Invoicing, Deposit, Refund, Discount, Final Settlement, Service Cancel, etc. ❖ Post-voucher activities (Item Cancel / Discount / Referral / Contact No. Change, etc.) are secured by limiting the access privilege and timeline. ❖ Services in progress cannot be cancelled from bills unless authorized ❖ Add referral information at runtime without leaving the billing form ❖ General/Special Discount facility, Package billing facility ❖ Report delivery date and time auto-calculation based on Urgency ❖ Consumable items identified and added to bill automatically ❖ Suggests items for recurring patients based on most recent bill ❖ Quick navigation between different billing screens ❖ Bill/Invoice is sent directly to printer ❖ Cashiers instantly views his/her Transaction Report ❖ Various Payment mode (Cash, Card, Cheque, Advance Adjust) facility ❖ Tagging the Doctor/Physiotherapist/service provider during billing ❖ SMS to patient's attendant/payee's mobile with payment and due info 	<p>Actions: OPD Service Billing OPD Consultation Billing OPD Emergency Billing IPD Invoicing IPD Business Office Advance Receive Billing Advance Refund Registration Card Billing Bill/Item Cancel Bill Edit Bill Edit (Advanced) Bill View and Re-print Bill/Item Cancel Approval Due Collection Due Collection with Discount Inventory - Consumption Inventory - Requisition Inventory - Issue Inventory - Stock Position View</p> <p>Reports: My Collection Current Due Bills IPD Doctor's Bill IPD Patient Bill Status</p>
Pathology / Laboratory	
<ul style="list-style-type: none"> ❖ Work list-based Sample collection enables phlebotomists manage the collection very quickly and easily ❖ Less Turn-around-time (TAT) ❖ Test results are sent to the system database automatically from the analyzers. If the test is done several times for accuracy, results are updated automatically each time ❖ Faster test and accurate result ❖ No mismatch between patient and sample ❖ Notification system alerts lab users on samples run in the analyzer while sitting on the desk ❖ Any analyzer can be integrated in unidirectional or bidirectional mode if supported by analyzer itself ❖ QC data is brought to software automatically 	<p>Actions: Report Parameters Analyzer Settings Sample Collection Reporting Verification Report Dispatch QC Entry Inventory Functions</p> <p>Reports: Service Count QC Log</p>

❖ Reagent Consumption, Requisition, Stationary Inventory – all built-in

Machine-wise Host Parameters
Result Analysis

Staff & Corporate

- ❖ Discount Setup
- ❖ Minimum Payable Setup
- ❖ Company and Staff Setup
- ❖ Bulk collection of Due bills at month end
- ❖ Easy tracking of Corporate Sales
- ❖ Easy tracking of Corporate Staffs

Actions:
